

March 22, 2021

Screening and early detection workgroup minutes

1.) Introductions:

Jasmine Slater, Heather Ross, Kim Nelson, Tanya Riekens, Valerie Walsh Haines, and James Hruby

2.) Recap of the purpose of the workgroups:

Group spend time discussing barriers of screening and things that could be done in local communities. Conversation was done on roles that each member plays in their communities and what they would like to see in this work group. Discussion was made that Wyoming Cancer Program screens for specific populations and cancers, but what could this group do for screening in general. Also mentioned the short fall of not knowing all the resources that are available in local areas.

3.) Identify a lead if there is not already a workgroup lead

Group was not able to come up with lead, would like more time to consider. Was agreed that James Hruby would set up additional meeting to further discuss how and when work group would be meeting.

4.) Review workgroup's section of the plan

Specific Goal and strategy was not discussed, but will revolve around ideas discussed in recap of the work groups and addressing screening numbers with project.

5.) Identify frequency/day/time of regular workgroup meetings for 2021.

Was not able to discuss frequency, it was mentioned to start to have monthly meeting. Will discuss further in next meeting.
